

**“In Another
Six Months
THE BATTERY
PROBLEM
Will Be
BEHIND US
And We Will See
MORE
2-WHEELER EVs
On The Road”**

SURESH KAMATH
MANAGING DIRECTOR,
AVNET INDIA

The above statement was amongst many that left a lasting impression on EFY's Sharad Bhowmick and Rahul Chopra when they spoke to Suresh Kamath. Suresh is a veteran in the electronics industry who has been dealing with electronification of 2-wheelers since 1996. Here are a few excerpts

What's your take on the readiness of our R&D teams for battery management systems (BMS)?

The 2-wheeler EV market is not mature yet. There is still lot of work being done in the BMS area. There is problem in the lithium-ion batteries, which are flamma-

ble at high temperatures.

It's a learning curve for all. Unlike the mature 4-wheeler market across the globe from whom India can adapt new technologies, the Indian 2-wheeler EV market will have to depend a lot on our internal
