

la Group of Companies, Kochouseph Chittilappilly. The funding also saw NIDHI Seed Support Scheme (Venture Centre, Pune) of the government of India's Department of Science & Technology and a few other angel investors as participants. EyeROV will be developing new unmanned water robotics systems for the marine, oil and gas, and defence sectors. It has also developed India's first commercial underwater drone.

Waaree raises funds to expand PV modules manufacturing capacity

As per the latest reports, Waaree Energies Limited has raised around 100 billion rupees from various investors through primary funding. In this equity raise, the promoters also participated at the same valuation. The company plans to utilise the proceeds to grow and expand its manufacturing capabilities in India from 2GW to 9GW for PV modules, of which 5GW is operational and the balance 4GW is expected to be operational by January 2023. The company recently withdrew the DRHP filed with SEBI owing to the fund-raise.

Euler Motors raises funds to enhance its production capacity

Delhi based EV startup, Euler Motors, has secured a sum of 60 million dollars in its Series C funding. The round was led by Singapore's sovereign fund GIC, and it saw participation from ADB Ventures, Athera Venture Partners, Blume Ventures, Moglix, and QRG. It must be noted that Euler Motors was valued at \$200 million by these investors. The company wants to utilise the funding to enhance its production capacity while broadening its range of product offerings.

Orb Energy gets another round of funding for further expansion

Bengaluru based solar startup, Orb Energy, has secured the first tranche of a \$20 million loan from the US based Development Finance Corpo-

ration. The startup wants to utilise the proceeds to expand and energise its in-house solar energy solutions in India. It is noteworthy that the startup has raised funding worth more than \$13.6 million in the past, with Acumen Capital Market Funds I, Bamboo Capital Partners, FMO, Pamiga SA, and Rianta Capital lacing its cap table.

Sanmina and Reliance JV to boost electronics hardware manufacture

The joint venture between Sanmina and Reliance will create a state-of-the-art 'Manufacturing Technology Center of Excellence.' The official statement released by the parties specifies that this collaboration will leverage Sanmina's 40 years of advanced manufacturing experience and Reliance's expertise and leadership in the Indian business ecosystem. Sanmina's 100-acre campus in Chennai will cater to all the manufacturing needs of the JV.

BEL signs MoU with Triton EV for hydrogen fuel cells manufacture

As per the MoU signed at the recently held DefExpo-2022, Bharat Electron-

ics Limited (BEL) will manufacture hydrogen fuel cells with technology transfer from the US based Triton Electric Vehicle. The agreement will help partners tap both the Indian market and mutually agreed export markets. DefExpo-2022 was the 12th edition of India's flagship defence exhibition, which took place at Gandhinagar, Gujarat from 18th to 22nd October.

Tata Power partners with 75F Smart Innovations for energy-efficiency solutions

To promote building automation and energy-efficiency solutions in the commercial building space, Tata Power is partnering with 75F Smart Innovations to jointly help businesses across industry verticals like IT/ITeS, BFSI hospitality, healthcare, education, government, and retail to optimise their energy consumption and usage. It also aims to offer solutions in the space of HVAC (heating, ventilation, and air-conditioning) optimisation and smart building automation powered by advanced tech, including IoT, cloud, and AI/ML. Generally, HVAC constitutes over half of a building's total energy consumption.

SNIPPETS

- At the India Mobile Congress 2022 in Delhi, the Union IT Minister, Ashwini Vaishnaw, launched Sensorise SenseIT Energy's multi-access IoT device, which is a completely Made in India product.
- MediaTek reiterated its commitment to the 'Design in India' initiative. Strategic collaboration with Invendis was announced in line with the Aatmnirbhar Bharat endeavour to roll out 5G and Wi-Fi router solutions.
- Apple has started manufacturing iPhone 14 in India. Foxconn's Sriperumbudur facility situated on the outskirts of Chennai is the manufacturing location. By 2025, the tech giant wants to shift 25% of its entire iPhone production line to India.
- IITH Smart City Living Lab and Silicon Labs recently announced a partnership to unveil a campus-wide Wi-SUN network to enable research and solutions for the IoT and smart cities.
- Fujitsu recently announced that it is working with Dell Technologies to build a joint reference architecture to simplify the deployment of open radio access network solutions.
- Itron and SmartThings are all set to collaborate in order to provide an integrated energy experience for carbon reduction. The companies will share their respective services like distributed intelligence ecosystem and real-time energy readings.
- In the Series A funding round led by Molten Ventures, the London-headquartered deep tech company Hadean recently raised \$30 million. The company is involved in the immersive entertainment sector and works as an open platform for distributed cloud computing.
- GM Ventures made a strategic investment in Lithion Recycling Inc. This agreement is to pursue a circular battery ecosystem using Lithion's advanced battery recycling technology. The automaker invested via Lithion's Series A financing round.
- Drone tech company Asteria Aerospace recently secured India's first micro category drone type certification from the Directorate General of Civil Aviation. Asteria received the certification for its A200 drone, which is indigenously designed.
