

Ashok Leyland to make hybrid vehicles with help from IIT Madras

This collaboration between Ashok Leyland and the Indian Institute of Technology Madras (IIT Madras)

aims to develop and commercialise the 'Swirl Mesh Lean Direct Injection (LDI) system' technology. IIT Madras researchers at the National Centre for Combustion Research and Development (NCCRD) are working on developing an indigenously designed micro gas turbine. The parties will partner to develop a series of hybrid electrical vehicles using this turbine technology.

SenRa and Cranberry partner to install LoRaWAN smart water meters

SenRa recently announced its partnership with India based water management company Cranberry Analytics. The two companies will work together in the upcoming smart water metering project in Goa, where Cranberry will use SenRa's public LoRaWAN network. Panaji PWD chose Cranberry Analytics to install ultrasonic smart water meters to replace mechanical ones. This smart water metering contract initially consists of 3094 consumer-grade mechanical water meters with LoRaWAN-enabled ultrasonic smart water meters.

Infineon collaborates with VinFast and LG to drive Asian innovation

Infineon is partnering with VinFast and LG Group's R&D hub LG Science-park to drive Asia's innovation ecosystem. This collaboration was unveiled at the OktoberTech Asia Pacific event of Infineon. VinFast and Infineon will establish the 'VinFast Infineon Competence Center' in Hanoi in early 2023, which will accelerate the co-development of future solutions for smart mobility, such as the next-gen electric drive train for EV platforms.

Silicon Labs sets up the largest IGBC platinum-rated campus in Hyderabad

Silicon Labs recently inaugurated its new office at Salarpura Sattva Knowledge City in Hyderabad, which is "one of the largest Indian Green Building Council (IGBC) platinum-rated campuses."

Jayesh Ranjan - Principal Secretary of the Industries & Commerce (I&C) and IT Departments of the Telangana government, Matt Johnson - President and CEO of Silicon Labs, and Manish Kothari - Senior VP at Silicon Labs India, inaugurated the facility. The company has also partnered with the government of India's Ministry of Electronics & IT, the government of Telangana, and the European Business and Technology Centre (EBTC) to set up the Smart City Living Lab at the International Institute of Information Technology, Hyderabad.

Aether Industries' R&D centre creating more employment opportunities

The R&D centre of Aether Industries in Surat, Gujarat was inaugurated by Padma Vibhushan Prof. Man Mohan Sharma and is said to support innovation for the company's continually growing internal product range in the large-scale manufacturing business model. The employee count has also grown from 164 employees in March 2022 to 193 in September 2022. The company expects to employ at least 225 individuals at the centre by the end of FY23.

CWD develops a dual combo module for IoT connectivity

CWD Limited recently developed a dual combo module for IoT device connectivity with the help of Semtech Corporation LoRa Connect platform and the LoRaWAN standard connectivity. The CWD CBTLRM02 dual combo module is used in smart utility meters and wearables with Semtech's LoRa Connect (SX1262) system on chip (SoC) for communication.

The provision of extended range at extremely low power to enable a multitude of applications, such as asset tracking, agriculture sensors, and industrial automation, is also present.

EESL and MECS to deploy over 20,000 induction and electric cookers in India soon

Energy Efficiency Services Ltd (EESL) and the Ministry of Power, along with the International Solar Alliance (ISA), have supported the first edition of the Modern Energy Cooking Forum 2022. Emphasising electricity, batteries, and solar energy, this forum was organised by the Modern Energy Cooking Services (MECS) and the World Bank's Energy Sector Management Assistance Programme (ESMAP), in collaboration with Finovista India, their in-country partner, at New Delhi. EESL and MECS agreed to collaborate in large-scale deployment of over 20,000 electric pressure cookers and induction cooktops in the country.
