

EPC-R7000 is NVIDIA Jetson TX2 Edge AI Inference System

EPC-R7000 is NVIDIA Jetson TX2 Edge AI Inference System. Some of its features include powerful Nvidia TX2 SoC with 256 CUDA core GPU, 2x PoE for camera connection, and Wide-temperature 0 ~ 55° C (32 ~ 131° F) & a fanless design for rugged environments & Jetpack-enabled AIM-Linux / Edge AI Software package.

The EPC-R7000 uses NVIDIA® Jetson™ TX2 as the edge AI core that leverages image and video capabilities

and 256 CUDA core inference computing for real-time driver behavior analysis and license plate detection and recognition.

To detect illegal activity, ANPR or object detection a highly reliant upon high-resolution cameras is required. The traditional process, transmitting all streaming video to the backend server, was not a suitable solution in this case due to the huge volume of video data. Having a real-time response capacity was also a key factor. An Edge AI system that handled near-site camera video streaming and performed AI inference for driver behavior analysis and license plate recognition is required for resolving this challenge.

To guarantee real-time monitoring and provide the best 24/7 service, a secure and reliable Edge AI system is needed. Remote management and maintenance are crucial.

The EPC-R7000 offers a Jetpack-enabled AIM-Linux/Edge AI software package for accelerating AI developer access and outstanding hardware

performance on AI inference applications and DeviceOn installation for remote management and maintenance.

In short EPC-R7000 is an ARM-based Edge AI Inference Box Computer powered by NVIDIA® JETSON™ TX2Dual-Core NVIDIA Denver2 + Quad-core ARM Cortex-A57 processor and NVIDIA Pascal™ 256 CUDA cores GPU that provides high-performance computing, supports TensorRT, cuDNN, VisionWorks framework for AI application.

Wanna Be Your Own Boss?

DO OPEN SOURCE.

www.opensourceforu.com

Demand for Open Source is sky rocketing. Be it for managing IT infrastructure or development of software—Open Source solutions are what customers are seeking.

All you need to do is develop expertise in an Open Source stack, and then build a team around it!

And, Open Source For You can be your friend and a guide through this journey.
