

SNIPPETS

- An MoU has been signed between the Health and Education Department, Administration of Union Territory of Ladakh, with Energy Efficiency Services Limited (EESL) to integrate renewable and efficient energy technologies
- Delhi government has launched an online tool to find EV charging and battery-swapping stations in the city.
- Launched at the annual flagship event, 'Siemens India Innovation Day 2022' in Mumbai, the Siemens Xcelerator enables an ecosystem that includes digital and Internet of Things (IoT)-enabled offerings (software, hardware, and digital services) not only from Siemens but also certified third parties.
- The Tech Quotient app tests players' technical knowledge, engineering know-how and pop culture acumen through entertaining tasks and quizzes. As the new school year commences, a donation will be made to local STEM education for each app download.
- Topcon Positioning Group partners with Vodafone to work on a new mass-market positioning system that will be able to locate IoT devices, machinery, and vehicles with enhanced precision than is currently possible with individual global navigation satellite systems (GNSS).
- Morse Micro has raised \$140 million in Series B funding, which was led by Japan based MegaChips Corporation. Morse Micro believes that this strategic partnership with MegaChips will help it speed up the IoT project and revolutionise the Wi-Fi HaLow technology.
- Reliance Industries recently acquired a majority stake in SenseHawk, a software development startup based in California. The \$32 million-worth agreement between the Indian giant and solar-power-specialised software developer includes funding for R&D, growth, and commercial rollout of products.
- Indio Networks partners with Beetel Teletech Limited to establish a stronghold in the Wi-Fi market in India.
- In the Series B funding round led by Belden Inc., industrial IoT (IIoT) startup Litmus Automation recently raised \$30 million, taking its funding total to \$42.6 million.
- TechnoBind partners with ExaGrid to provide customers with a unique disk-cache landing zone and scale-out architecture that provides the fastest backups, the fastest restores, and a fixed-length backup window as data grows.

mitted to partnering with all states to support startups and entrepreneurs keen on investing in this sector.

Vedanta to set up \$20 billion chip unit in Gujarat

As per the latest reports, the Vedanta Group plans to build a semiconductor manufacturing unit in Gujarat. Though a formal announcement is awaited and might come soon, the company has already identified land for setting up this chip unit in the state. Initial plans to invest a sum of \$2 billion in the semiconductor unit is awaited, but as the Mumbai-headquartered company expands the project, the amount is expected to go up to \$20 billion in the coming times.

Wistron likely to invest in Telangana in 2023

As per reports, the state of Telangana expects to witness huge investments from the electronics manufacturing service (EMS) major Wistron Corp in the coming year. The Information Technology Electronics and Communication (ITE&C) Department of Telangana said that the company

has stipulated to establish a product manufacturing unit for consumer electronics and electrical vehicles. The details are to be finalised in January 2023.

ABB India planning Bengaluru smart power factory upgradation

ABB India has announced the factory upgradation in Nelamangala, Bengaluru. The smart power factory connects robots and motors and drives to the Internet of Things (IoT). It is said that the connected factory software helps in maximising productivity and energy efficiency by 40% and 15%, respectively. The facility, which spans over 8400 square metres, aims to serve the expanding demand across electricity-consuming sectors.

Lam Research opens centre for engineering in Bengaluru

As an integral part of Lam Research's leading-edge global network of labs, their new centre in Bengaluru will focus on research and development, engineering, and testing of wafer fab-

rication hardware and software used in the creation of next-generation DRAM, NAND, and logic technologies. The company also announced scholarships for three female students to pursue their engineering studies.

Tata Power aims big with nation-wide EV chargers

Tata Power's EV chargers station map will encompass Kashmir, Kanyakumari, Guwahati, Dwarka,

and Bikaner. The company aims to deliver these EV charging stations in the next 3-5 years. It says that EV owners can make use of the Tata Power EZ charge mobile app to locate the nearest charging stations on the go. Tata Power has set up over 450 EV charging points across 350 national highways in the country, which span over 25 states and 5 Union territories.

Shell to set up 10,000 EV charging points by 2030

With its plan to set up over 10,000 charging points in the country by 2030, Shell India recently unveiled its first electric vehicle (EV) chargers in Bengaluru. These chargers are powered by 100% green energy and are meant both for four-wheelers and
