

communication, robotics, sensors, human interface devices and for the Industrial Internet of Things (IIoT) connectivity. Capable of Cat6A performance, it comes in a 70 per cent smaller package than the size of a typical RJ45 connector. With 10mm connector pitch, robust 2-point metal latching, 360-degree shielding for EMI immunity, it is built to meet the needs of new higher density industrial Ethernet communication designs.

Gaming chipsets

MediaTek has launched two new mobile gaming chipsets, Helio G70 and Helio G80. These feature HyperEngine game technology, advanced multi-camera and unrivalled connectivity for uninterrupted gameplay. Through this release, the company aims to equip smartphone users and gaming enthusiasts with high-end features at mid-tier prices. Built on 12nm process, the Helio G70 and G80 incorporate Arm Cortex-A75 CPUs that operate up to 2GHz, along with six Arm Cortex-A55 CPUs that operate up to 1.8GHz for an improved

single and multicore performance. For ensuring a highly responsive gaming experience, an Arm Mali-G52 graphics processor operates at 820MHz on the Helio G70 chipset and up to 950MHz on the Helio G80. The chipsets offer other smartphone enhancements like integrated Voice Wakeup (VoW), advanced multi-camera photography and faster overall performance.

POWER SUPPLIES

Lithium-ion pin batteries

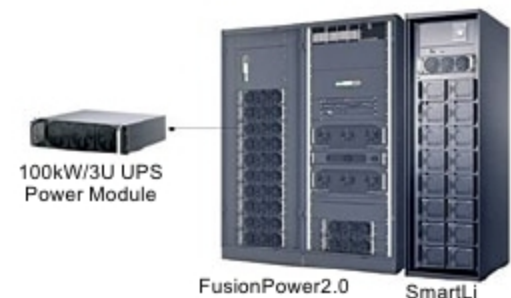

Panasonic, USA has announced a new addition to its line of lithium-ion pin cells for the wearables market. The Panasonic CG420A lithium-ion pin batteries have a spiral wound construction that enables higher reliability and rapid charging (80 per cent charged in 20 minutes), according to Panasonic.

The company opted for a stainless steel exterior container rather than polymer material to provide dimensional stability and prevent swelling over the CG420's lifetime. Panasonic is offering the product with tabs. The company says the batteries, which are 4.7mm in diameter, are ideal for a range of wearable applications including hearing aids, smart inhalers, smart glasses, styluses and more.
