LiveHealth

Visit: <https://livehealth.in>
Full version: Paid

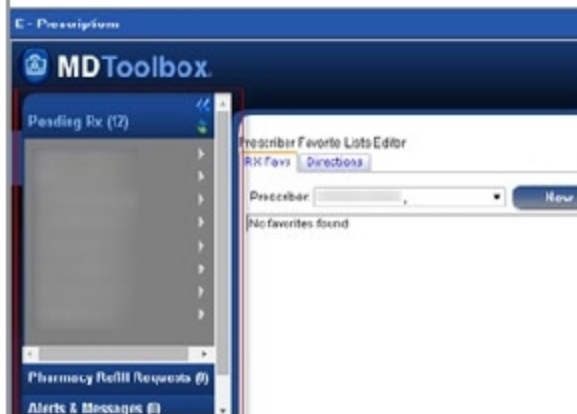

LiveHealth is a medical laboratory management software to automate regular operations. Front desk tools like configurable forms for patient registration, online payment collection, and automated communications via SMS or emails enable better patient management. Sample management, segregation (through colour coding and barcodes) and rejection are done through predefined methods, which can be tracked in real time. Cloud storage, campaigns for patients, easy collaboration with other labs and diagnostic centres, real-time business insights are some other features offered in the software. Options like auto-validation, personalised onboarding, auto-dispatch and delivery of reports to patients and organisations, and loyalty cards are also available for enterprise customers.

MDToolbox-Rx

Visit: www.mdtoolbox.com
Full version: Paid; free trial

MDToolbox-Rx is a customisable e-prescribing solution for medical organisations. With a user-friendly interface, organisations can create and send or receive electronic prescription orders and refills from different pharmacies. Users can search for medicines based on such parameters as name, brand and generic status in the comprehensive drug library. Besides helping patients, the software also improves safety and office workflow. Other features include an inbuilt drug reference library, integrated dosing calculator, availability of common scripts library, favourites list for prescribers and practice, display of price information and personalised prescription benefits in real time, among others.

Mediware

Visit: www.datamateindia.com
Full version: Paid

Mediware is a hospital management software that consists of tools for management of front office, in patients, electronic medical records, blood banks, pharmacy, finance, health insurance and the like. Using the medical equipment interface, data can be transferred from instruments to computers directly. Laboratory information system module processes and stores data related to medical testing, specimen and more to save time and send SMS to the concerned doctor if a report contains alarming parameters. Module to prepare radiology reports like ultrasound, x-ray and CT scan is also available. A picture archiving and communication system allows secure and rapid transmission of images anywhere in the world.

Valant

Visit: <https://valant.com>; **Full version:** Paid

Valant is an electronic health records software that allows prescribers (psychiatrists, physician assistants, psychiatric nurse practitioners), non-prescribers (psychologists, social-work therapists, counsellors) and the like to enhance patient engagement and, hence, results through automated tools. Features include customisable pre-set appointments, efficient creation and storage of notes through documentation tools, faster claim turnaround, collaboration across provider specialties, built-in alerts and reports, tracking updates and so on. Users can access records and pharmacies whenever required. It is easy to use and saves time through a streamlined workflow.
