

athenaCollector

Visit: www.athenahealth.com; **Full version:** Paid

athenaCollector is a medical billing and revenue cycle management solution. It allows fast collection of payments and verification of insurance eligibility of patients in advance or real time without any hassles. Healthcare professionals can optimise their appointment schedules and send automated reminders to patients. Detailed and on-demand reports on user performance in real time help in improving results. A simple interface for the revenue cycle dashboard enables easy access to revenue cycle tasks and patient information. Other features like claims management are also available on the software.

1mg

Updated: March 2020

OS: Android and iOS

Download: Full version (free)

1mg allows users to view medicine information, read personal health tips, book lab tests and health check-ups, buy medicines and consult doctors from various specialities online. On searching for any medicine, information such as treatment uses, side effects, usage recommendations and expert advice gets displayed on the app. General health check-ups and sample collection can be done at users' homes. Over-the-counter health products and medicines (like allopathic and homoeopathic) can be ordered at low prices in more than a thousand Indian cities. The latest version comes with ratings to help users make correct buying decisions.

G1 Health

Updated: March 2020

OS: Android and iOS

Download: Full version (free)

G1 Health app provides reliable aid in emergency situations. By sharing patients' location with the life support ambulance service provider (integrates with GVK EMRI 108 Call Ambulance), specialised doctors, first responders and close ones nearby, people get relief at the earliest. The app community consists of doctors and experts as well as people who had related health issues previously to answer user queries. Videos are available in several Indian languages to teach individuals to help others in situations like unconsciousness. Other features include pill reminders, message requests for blood donors, micro-insurance, integration with G1 Rakshak device and so on.
