AI INSURANCE IS COMING

EFY is still one of the favourite magazines. I find it interesting and valuable even after I have switched from electronics to the open-source software world. The article 'AI Insurance Is Coming, Here's Why' by Anand Tamboli in July issue is a really good one!

Deepen Dhulla

EFY SUBSCRIBERS

I am your fan since 1999. Your work is admirable!

Arif Aleem Shamsi

EFY. Thanks to all of you for the feedback!

□ I was an EFY subscriber twenty seven years ago. Now I want to subscribe to your EFY once again.

S.P.S.N. Samantaray

EFY. Welcome back! EFY is yours, not ours. Everything we do is for you, keeping readers like you in mind. EFY digital version is also available. Please contact our support team at support@efy.in for detail.

MAKE YOUR OWN BREADBOARD SMPS

I have a doubt in 'Make Your Own Breadboard Switch-Mode Power Supply' DIY article published in March issue, which is also available on your website at:

<https://www.electronicshobby.com/>

electronics-projects/hardware-diy/breadboard-smps-circuit

Is this circuit for an inductive load?

Ashok Patel

The author A. Samiuddhin replies:

Any type of load can be used in this circuit. This is a versatile DC-DC converter circuit. The output is adjustable from 1.23V to 37V up to 3A maximum load current. For further details, please refer to its datasheet.

□ Where can I get inductor L1 used in 'Make Your Own Breadboard Switch-Mode Power Supply' DIY article? Can I make it at home?

Sabir Hussain

EFY. Fixed inductor L1 used here is easily available in the market. It is similar to a fixed carbon resistor but slightly bigger in size. You can also make it yourself using copper wire. There are many tutorials available on the Internet for making inductors at home.

...

NOISE DETECTOR

This is regarding 'Make This Noise Detector For A Noise-Free Zone' DIY article published in March issue. This project did not work well for me. The sound sensor gives 0 (zero) value all the time.

Salma

The author Ashwini Sinha Kumar replies:

You need to elaborate more on the problem. First, check your sensor with a simple test from Arduino IDE. Go to Examples and upload ReadAnalogVoltage or AnalogReadSerial code to Arduino and observe the sensor output on the serial monitor. Check if it is increasing with noise. If not, then try to increase the sensitivity of the sensor using a potentiometer on the sensor module.

Don't Be A Loser!

You don't know how much you don't know.
