

Nearpod

Visit: <https://nearpod.com>; **Full version:** Paid

Nearpod is an instructional platform that allows users to find or create lessons for all K-12 subjects. Students can access self-paced lessons anytime and anywhere, and teachers gain information on their weak areas based on post-session reports. There are activities and assessments for learning communities like virtual reality, collaborative boards, polls, and game-based quizzes. There are options for integration with learning management systems (like Google Classroom, Canvas, Schoology) and usage of Web conferencing platforms for distance learning.

Duolingo

Updated: July 2020

OS: Android and iOS

Download: Full version (paid)

Duolingo is a language learning app designed by experts that allows users to learn more than 35 languages, including English, Spanish, French, German, Italian, Russian, Hindi, Swedish, Welsh, Arabic, Hawaiian, Korean, Japanese, and more on the go. Lessons that have speaking, translating, and multiple-choice questions, come in the form of bite-sized challenges to help users build speaking, reading, listening, and writing skills. Skill-based practice sessions focus on errors made while playing individual challenges for improvement and long-term retention. Additional features like mastery quiz to measure progress, course downloads, and ad-free lessons available on Duolingo Plus are offered for free on a seven-day trial.

WolframAlpha

Updated: June 2020

OS: Android and iOS

Download: Full version (paid)

WolframAlpha uses built-in computational algorithms, knowledge base, and artificial intelligence (AI) technology so that users can avail instant expert knowledge and answers to calculations. The knowledge engine accepts completely free-form input and generates powerful and lucid results. Topics included are from domains like physics, sports, mathematics, statistics and data analysis, chemistry, medicine, engineering, astronomy, life sciences, weather, geography, finance, units and measures, among others. Pro version has options for downloading data, generating visuals for presentations, and so on. Parts of WolframAlpha are also used in Apple's Siri assistant.
