

A leading light in engineering improved LED performance

We don't just strive to exceed expectations, we innovate to make the best of industry, perform better.

The LED market is the perfect example of our capabilities in action. LEDs are considerably more efficient than traditional lighting forms, but they do still produce some heat, which without thermal management will have an adverse effect on both the efficiency and operational lifetime of the LED.

From bonding and non-bonding thermal interface materials, to thermally conductive resins and protective conformal coatings, our solutions offer the ultimate level of protection and heat dissipation for your LED application.

With an expansive product range and a strong emphasis on research and collaboration, we provide a complete electro-chemical solution to the world's leading LED manufacturers.

Isn't it time you discovered how Electrolube can serve you?
