

QUIKorrect – Static Servo Stabilizer

Up to 200KVA Technology transfer from MEDI

Servo manufactures - time to switch to static voltage stabilizer

IGBT based PWM type STATIC VOLTAGE STABILIZER design

PATENTED TECHNOLOGY

Manufacture in your own brand name.

Maintenance free, proven design in the field for over 10 years

- No wear and tear like servo stabilizers
- No tap changing like SCR or relay based stabilizers
- 1% tight regulation
- 85V to 300V input range, output 220V $\pm$ 1%
- Can handle 10 times surge load

Highlights of QUIKorrect

- * Instantaneous correction. Speed over 20000V per second.
- * Discrete IGBT up to 90KVA three phase and IGBT module up to 200KVA.
- * Protections- overload, short circuit, low voltage, high voltage etc.
- * Can withstand up to 800V continuous input.
- * 6KV lightning protection for 8/20uS.
- * Protection for neutral failure/ neutral floating & double phase, no need for isolation transformer.
- * Uninterrupted bypass during hazardous conditions.
- * LCD & data storage for over one year.
- * IOT cloud monitoring, control & graphical analysis.
- * Data of more than 1 year can be stored - input V, output V, load, power failure etc with date & time stamp. USB port for transferring data to pendrive.

For video demonstration, go to google / youtube and search "QUIKorrect"

**BOM of a 20KVA single phase QUIKorrect
Static Stabilizer with input range $\pm$ 10% = Rs.12000**

Technology transfer up to 200KVA three phase – Rs.11,00,000
