Samsung to invest US\$ 500 million to set up display manufacturing plant in India

Samsung is investing 500 million dollars in India to set up a manufacturing plant on the outskirts of New Delhi. The plant will produce displays for smartphones and other electronic devices. The company also revealed that it has allocated some land area from its existing factory in Noida for this new plant.

Samsung opened a factory in Noida in 2018. It had spent about 700 million dollars for that factory. The company claimed that it was the world's largest mobile manufacturing plant.

Currently, Samsung is the second-largest smartphone player in India, and covers the world's second-largest market with nearly 500 million smartphone users.

Chinese firms seeking land in Greater Noida

Five Chinese firms intend to get land in Uttar Pradesh's Greater Noida to set up their manufacturing units, officials said. Investments in these units are expected to touch eight billion rupees.

According to the report from PTI, the development comes within three months of a delegation of state government officials visiting Chinese cities of Gungzhou, Dongguan and Shenzhen to attract investments.

Executives from China's Holitech India Pvt Ltd, a component supplier to leading phone manufacturer Xiaomi, met with officials of Greater Noida Industrial Development Authority (GNIDA) and handed over letters of intent from five partner companies.

Vodafone partners with Nokia to deliver 5G in first half of 2020

Vodafone has partnered with Nokia to commence the rollout of its 5G network in the first half of 2020. "We have worked with Nokia for several years across different elements of our network. The company presented a compelling roadmap that aligned with our 5G objectives and will help us to continue improving our 4G network for our customers," said Iñaki Berroeta, chief executive officer, Vodafone.
