

ZapWorks

Visit: <https://zap.works/>; **Full version:** Paid; free trial

ZapWorks is an AR toolkit that enables designers and developers to quickly build, publish, analyse and scale AR experiences for applications in the fields of retail, packaging, education and events. Widget tool provides a drag-and-drop interface that makes it easy to add images, video, audio, images, buttons, Web links and the like. For enhanced experiences, designer or studio toolkits can be utilised. Real-time statistics on parameters, ranging from total scans to the operating system used, help in understanding the effect of such interactions as marketing campaigns.

SketchAR

Updated: December 2019

OS: Android and iOS

Download: Full version (paid)

SketchAR provides a simple way of tracing sketches by putting virtual images from a phone onto any desired surface like canvas, wall and the like. It does away with the need for pre-installed markers through computer vision. By utilising AR, it saves time of professional artists and speeds up learning process of those who want to draw animals, graffiti, cartoons, anime and more. For correct detection, a bright environment is necessary. Drawing can also be practised on its drawing tool, which comes with such different options as pencils, markers and brushes. Time lapse of drawing process gets saved automatically and can be shared with others.

Houzz

Updated: January 2020

OS: Android and iOS

Download: Full version (free)

Houzz is an app for designing and enhancing the interiors and exteriors of a home. View in My Room 3D feature enables viewing 3D products in an area using the phone camera. Users can browse photos of interiors and exteriors, select designs based on style, location and room type, and share them with others. Items in the images can be discovered and bought directly through visual recognition technology. Sketch feature allows users to add comments and drawings on photos. Other options include connecting with home improvement professionals, reading articles, watching videos, getting advice and feedback, among others.

iOS

Google Lens

Updated: December 2019

OS: Android

Download: Full version (free)

Google Lens is an image-recognition app that lets users gain information about different objects around them using the phone camera. Features include text scan and translation in all languages supported by Google, plant or animal identification, QR codes and barcodes scan, getting details about nearby landmarks and storefronts, viewing dishes offered by a restaurant and more. Users can search for such items as clothes, furniture and home decor similar to the ones they wish to buy or own. For iOS, it is integrated into Google Photos and Google app.

Android

MagicPlan

Updated: November 2019

OS: Android and iOS

Download: Full version (paid)

MagicPlan lets users create complete 2D floor plans and 3D models easily by scanning a room with the phone camera. These plans can be furnished with more than thousand objects (like furnishing, plumbing, electrical, etc) and exported in PDF, JPG, PNG, SVG, CSV and DXF formats. Users can connect a laser distance meter via Bluetooth. Other options include creating customised objects, creating virtual tours with 360 panoramas, adding images and notes, getting statistics, cloud backup, synced elevation view, estimating materials and their costs, and so on.
