

Zoi Meet

Visit: www.zoimeet.com; **Full version:** Paid

Zoi Meet is an artificial intelligence (AI) platform used for automatic audio-recording and note-taking during in-person meetings or video-conference calls. It reduces additional workload afterwards and improves accuracy with industry terminology modules and custom dictionary additions.

Users can review, edit and export all their meetings. The option of integration with third-party software like Zoom and Skype is also available. Zoi Meet ensures smooth collaboration as the team's meeting archives can be accessed from anywhere by members even if they were absent. It supports up to five different languages.

AQI India

Updated: November 2019

OS: Android and iOS

Download: Full version (free)

AQI (air quality index) India uses algorithms and pollution-detection sensors to provide accurate information about air quality of a place through AQI, PM2.5, PM10, temperature, humidity and noise parameters, in real time. Data can be streamed live on the app or website. Based on data of the chosen location, users get personalised health advice, which is useful for planning outdoor activities. Different states and major cities can be compared for AQI values from 24 hours, seven days and one month. Widget option on home screen allows users to access information on-the-go.

Earth Now

Updated: December 2018

OS: Android and iOS

Download: Full version (free)

Earth Now by NASA uses Earth Science's satellites to picture recent worldwide climate information that includes such vital parameters as surface air temperature, ozone, carbon-monoxide, carbon-dioxide, water vapour, gravity and sea-level variations. False colour maps are used to describe data sets. Colour-coded legends denote the relative strength or weakness of an environmental condition. The latest version includes orbit lines for spacecraft, current carbon-dioxide data, GRACE-FO (Gravity Recovery and Climate Experiment Follow-On) spacecraft model, and so on.

Trashman

Updated: July 2019

OS: Android

Download: Full version (free)

Trashman is an online facility that allows users to dispose of their trash in several areas of Chennai in an eco-friendly way and decrease usage of landfills. With Google Maps integration, booking for selling such wastes as bottles, batteries, e-waste, old papers, books, cardboard boxes, ceiling fans, motors and pumps, and metals like iron, aluminium, steel, brass and copper, among others can be easily done through the app. At the set time and place, users receive cash and plant saplings based on measurements taken after waste segregation.

Android

Environment Challenge

Updated: December 2019

OS: Android

Download: Full version (paid)

Environment Challenge helps users be aware and do their bit for the environment.

The app offers different challenges with different levels which on completion add points to users' account. It also provides real-time information about air quality in the users' city and country, sound pollution detection, world events and daily news related to the environment, water pollution and quality as well as state of the ecosystem and vegetation in the users' country. The latest version includes support for Chinese language.

Soil Health Card App, DACF&W

Updated: August 2019

OS: Android

Download: Full version (free)

Soil Health Card app by the government of India lets users register soil samples collected at the farm fields in a particular location. The app automatically fetches coordinates of a place to ensure credibility and sends data to National Soil Health Card portal whenever an Internet connection is established. Registration process includes entry of details such as farmer's landholdings, crops, fertilisers available or required, and more. Based on the entered information and lab test results of samples, farmers are provided with soil nutrient status of their holdings, required changes and advice on fertiliser usage for better results while maintaining soil health.
