Smart TV

Powered by Android 9.0

Right from watching detail-rich movies to playing graphic-heavy games, viewers can reimagine entertainment with Nokia TV. Powered by PureX quad-core processor and 2.25GB RAM, Nokia 139.7cm (55-inch) TV delivers content that is brighter, sharper and more vivid. Features like Intelligent Dimming Technology, Dolby Vision and HDR 10 further enhance the viewing experience.

Backed by Dolby Audio, Dolby Digital and DTS TruSurround technologies, Nokia TV features bottom-firing speakers that deliver powerful audio. Further, Clear View technology and Clear Sound technology reduce noise for digitally-streamed content.

Flaunting quite a futuristic yet minimalistic design, the TV sports

a bezel-less design to maximise the active space, thereby giving users a seamless infinity-edge viewing experience. The TV also comes with Google

Voice Assistant, and hotkeys for Netflix and YouTube so that users can spend more time enjoying the content than searching for it.

Portable smart speaker

Comes with a fabric design and 360-degree sound

Amazon has come out with a portable Echo Input speaker for Indian customers. As the name suggests, Echo Input Portable has been designed to work wirelessly and can be easily carried around. The device packs a 4800mAh battery, which allows it to play ten hours of music without being plugged into the wall.

Amazon Echo Input Portable has its own speakers, making it self-sufficient. There is no 3.5mm jack, but the device can be connected to an external speaker over

Bluetooth. One can also use Bluetooth connection to play music from the phone.

Echo Input Portable natively supports Amazon Prime Music and Apple Music plus JioSaavn, Gaana and other local services—just connect it to the home Wi-Fi connection and

ask it to play some music.

Headphones

Making fitness more entertaining

AQFIT enters the smart hearable segment with the launch of A8 wireless neckband in India. The ultra-lightweight neckband is powered with a battery life of twelve hours. The magnetic buds ensure that the headphones are not dangling when not in use. The device comes with a flat tangle-free cable and is lightweight enough to be worn for hours continuously. It is IPX5 sweat-proof and comes equipped with CSR 8635 chipset.

Other features include Bluetooth version 4.1, music playing time of twelve hours and talking time of about ten hours, transmission range of $\geq 10\text{m}$, 3.7V/150mAh lithium-polymer battery and more.
