

Test Points

Table 2

Test Points	Detail	S1 Position
TP0	0(GND)	Clap/gesture
TP1	Train of pulses	Gesture
TP2	5V when S2 is on	Clap/gesture
TP3	6V	Clap/gesture
TP4	0(GND)	Clap/gesture
TP5	3.3V when S3 is on	Gesture
TP6	5V when S3 is on	Gesture

Calibration of sensor can be done by moving the transmitter in different directions and seeing how the robot moves. Each movement is indicated by the glowing of LEDs (LED6 through LED9).

For fun, you can conceal the gesture transmitter in the pocket of your shirt or pants. With slight adjustments in ADXL 335 sensor's position and
