

PLI scheme for promoting manufacture of medical devices

The Department of Pharmaceuticals (DoP) that falls under the Ministry of Chemicals and Fertilisers has notified a production linked incentive (PLI) scheme for promoting domestic manufacturing of medical devices in India. The new scheme proposes to extend a five per cent incentive on incremental sales (over the base year). This applies to medical devices produced in India, and these goods must be covered under the target segments.

DoP's official statement reads, "The expected incentive to the tune of ₹ 34.20 billion will be provided during the tenure of the scheme."

It is to be noted that India imported medical devices worth ₹ 433.65 billion during the financial year 2018-19. The export figures, during the same tenure, stood at ₹ 163 billion. India's share in the global medical

device market is 1.6 per cent.

Cancer care, radiotherapy medical devices, radiology and imaging medical devices, nuclear imaging devices, anesthetics, cardio-respiratory medical devices, renal care medical devices, and all medical implants have been included in the target segments of medical devices eligible under the PLI scheme.

The tenure of the scheme has been set from 2020 (base year) to 2026 (year of completion). This makes the scheme eligible for a maximum of five years.

The objective of this scheme has been announced as a step towards strengthening the existing infrastructure facilities to make the Indian medical device industry a global leader. The government has currently banned exporting any kind of essential medical devices in the wake of Covid-19.

MSMEs get additional assistance amidst Covid-19 crisis

The interventions by the government for micro, small and medium enterprises (MSMEs) have been gaining rapid traction. Under the emergency credit line backed by the government, banks from public and private sectors have so far already sanctioned loans worth over ₹ 790 billion as of 20th June. More than ₹ 350 billion has already been disbursed.

"As part of the Aatmanirbhar package, the government had announced its plans for three lakh crore rupees (₹ 3,000 billion) as an additional

credit to MSMEs and small businesses. Such enterprises were to be eligible to receive up to twenty per cent of their existing borrowing as additional loans at interest rates which were capped," reads an official press note issued by the ministry of finance.

The top lenders under the scheme are SBI, HDFC bank, Bank of Baroda, PNB and Canara bank. As per the ministry, this scheme has helped 1.9 million MSMEs and other businesses to restart their operations post-lockdown.
