

tion of manufacturing of electronic components and semiconductors (SPECS), and modified electronics manufacturing clusters (EMC 2.0) scheme, these were first announced in March 2020.

These schemes entail an outlay of about ₹ 500 billion (approximately 7 billion dollars). The schemes will help offset the disability of domestic electronics manufacturing and hence strengthen the electronics manufacturing ecosystem in the country.

The promotion of electronics manufacturing has been a key component of the Make in India programme. It is to be noted here that India's production of electronics grew from 29 billion dollars in 2014 to 70 billion dollars in 2019. The growth in mobile phone manufacturing, in particular, has been remarkable during this period.

EV sales increase with implementation of stringent emission norms

The global electric vehicle (EV) sales have increased with the implementation of stringent emission norms, as per Frost & Sullivan's recent analysis, Global Electric Vehicle Market Outlook 2020. The report says that global EV sales stood somewhere between ± 9 per cent in 2020 compared to 2019 under three different scenarios—gradual containment, severe pandemic, and global emergency.

It adds that as the market recovers, which is probably after June in the best-case scenario, it is likely to experience healthy growth. In an optimistic scenario, EVs market is estimated to grow by 8.6 per cent year-on-year (YoY), registering 2.5 million unit sales (battery electric vehicles plus plug-in hybrid electric vehicles) globally in 2020.

The report further adds that to tap into the growth prospects exposed by EVs, market participants should focus on the introduction of new models to help OEMs increase the percent penetration of EVs. It says that a big number of recyclers and dismantlers would come into play as the first phase of batteries will be available for second life or recycling.

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Event, Date and Venue	Topics	Contact address for details
IFA Berlin September 3-5, 2020 Exhibition Grounds Berlin Expo Center City, Messedamm 22, Berlin, Germany	Main meeting place for key retailers, buyers, and experts from the industry and the media	IFA Berlin Website: https://b2b.ifa-berlin.com
GITEX Technology Week September 27-October 1, 2020 Dubai World Trade Centre	World-class technology event. Technology leaders, enterprises and startups from around the world come together to show the future of every business and every industry	GITEX Website: www.gitex.com
OSI Days October 8-9, 2020 Nimhans Convention Centre, Bengaluru	Mega technology show with multiple events including expositions, conference and seminars	EFY Enterprises Pvt Ltd Website: www.opensourceindia.in
Engineering Design Show October 14-15, 2020 The Ricoh Arena, Coventry	UK's only event entirely dedicated to engineering, electronics and embedded design	Engineering Design Show Website: www.engineeringdesignshows.co.uk
3rd Automotive World October 21-23, 2020 Portmesse Nagoya, Japan	Exhibition and conference for advanced automotive technologies including electronics, smart factory and robotics	Reed Exhibitions Japan Ltd Website: www.automotiveworld-nagoya.jp
Light + LED Expo India 2020 December 3-5, 2020 Pragati Maidan, New Delhi	Will have Future Zone for innovative products, Solar Zone, and Launch Zone for new products	Messe Frankfurt Trade Fairs India Private Limited Website: www.in.messefrankfurt.com Email: deepak.bohara@india.messefrankfurt.com
CES 2021 January 6-9, 2021 Las Vegas, Nevada	Global consumer electronics show	Consumer Technology Association Website: www.ces.tech
NEPCON JAPAN January 20-22, 2021 Tokyo International Exhibition Center, Tokyo	Asia's leading electronics tech show about R&D and manufacturing, including packaging, with seven concurrent specialised shows	Reed Exhibitions Japan Ltd Website: www.nepconjapan.jp/en
India Electronics Week February 3-5, 2021 Karnataka Trade Promotion Organisation, Bengaluru	Mega electronics and technology show with multiple co-located events including expositions, conference and seminars	EFY Enterprises Pvt Ltd Website: www.indiaelectronicsweek.com

Since this information is subject to change, especially due to coronavirus breakout, all those interested are advised to ascertain the details from the organisers before making any commitment.

Compound semiconductor materials market to reach \$66.6 billion by 2027

The global compound semiconductor materials market is expected to reach 66.6 billion dollars by 2027, as per a report by Reports and Data. The report also says that Gallium Arsenide (GaAs) generated a revenue of 7.71 billion dollars in 2019 and is expected to grow at a CAGR of 7.7 per cent in the forecast period.

This is due to superior fundamental characteristics being utilised in the development of infrared light-emitting diodes, microwave frequency integrated circuits, solar cells, laser diodes, optical windows, among others.

The report further adds that power semiconductors are expected to grow at a CAGR of 8.3 per cent during the forecast period. This is due to highly conductive and flexible properties,

which can be used as a switch or rectifier in power electronics.

As per the report, the Information and Communication Technology (ICT) sector is the major contributor to the market. The construction sector of the Asia Pacific region is the major shareholder of the market and held around 29 per cent of the market in the year 2019 due to a variety of applications in the integrated analogue and digital circuits.

AI in healthcare market to reach \$45 billion by 2026

Artificial intelligence (AI) in the healthcare market is expected to grow at a CAGR of 44.9 per cent from 2020 to 2026, as per a report by Reportlinker. It will stand at 4.9 billion dollars in 2020 and reach 45.2 billion dollars by 2026.

The major factors driving the growth of the market are the increasing volume of healthcare data and
