

Voyager CommandTRACKER

Visit: <http://www.salientcrgt.com>; **Full version:** Paid

Voyager CommandTRACKER is an incident and asset management system that provides real-time awareness about the location of mobile users and assets, be it in vehicles or on foot via tracking of GPS-enabled portable and mobile radio units. 'Always On' geo-fencing alerts and notifications get triggered as assets enter or leave defined areas. Integration of third-party GPS devices to other existing applications or systems enables easy sharing of data amongst command staff, communications specialists, and emergency operations managers for management across multiple locations.

UgCS for DJI

Updated: June 2020

OS: Android and iOS

Download: Full version (free)

UgCS for DJI allows users to establish a connection between DJI drones (like Phantom 4, Inspire 2, Spark) with GPR mounted on them and UgCS desktop (version 3.5 or higher) ground station for uploading and carrying out a previously planned mission, or to fly the drone in 'Click&Go' mode. This enables ground-penetrating radar (GPR) surveys in harsh/hazardous environments without compromising the security of team members. It can also be used as a standalone application for manually flying drones. Other features include Live HD camera view, home position reset, flight simulation, support for metric and imperial units, and so on.

Mgrs & Utm Map

Updated: April 2020

OS: Android and iOS

Download: Full version (free)

Mgrs & Utm Map was developed to mainly help military personnel with GPS and coordinate systems. The app uses satellite navigation systems such as GPS, GALILEO, and GLONASS (GNSS) supported by smartphones and their sensors to show the most accurate position of the user. There are several location (coordinate) format options, including MGRS, UTM, or Latitude/Longitude. The centre of the map also follows user location while on the move, which enables measurements of distance, altitude, area, and the like. It can even assist users with outdoor activities and sports.

100% Army Fit

Updated: November 2019

OS: Android and iOS

Download: Full version (free)

100% Army Fit app by the British Army is a training and fitness tool built for prospective recruits who are preparing for an assessment, or even those who wish to achieve the fitness level of military personnel. It allows users to track their goals, which include training curated by fitness coaches for losing weight, increasing muscular strength, improving distance running performance, and the like. Training plans can be customised based on the user's requirements. The app also offers nutrition advice to ensure that exercises deliver expected results.

Military Flashlight

Updated: February 2020

OS: Android

Download: Full version (free)

Military flashlight app allows users to simply swipe for a strobe light and has different strobe light blinking frequencies, including Morse code SOS signal as well as a standard compass dial. Only smartphone camera access is needed for rear flash operation. It caters to all military lovers, veterans, soldier families, and personnel. Users can also personalise the torch with different colours (depicting Army, Navy, Marine Corps, Air Force, and Coast Guard). The ad-free version of this app is paid.

Android

Military News

Updated: March 2020

OS: Android

Download: Full version (free)

Military news app provides the latest news in the field of military/defence taking place around the world by analysing numerous news stories and breaking news from reliable news publishers. Updates on military programmes and such technologies as for military gear and equipment that are happening globally are also provided regularly. This includes notifications for breaking new stories and videos for a better understanding of different situations. Other features include a bookmarking system for future reference, news sharing options, and much more. The latest version comes with a username update option and other improvements for optimisation.
