

“Entrepreneurs Should Never Give Up, But Take Calculated Risks And Be Open Minded”

Sheer determination and ambition kept him going even through challenging times. Vick Aggarwala, president and CEO of Supreme Components International (SCI), talks to Baishakhi Dutta about his career path that has taken him across the globe

Vick Aggarwala
president and CEO, Supreme Components
International (SCI)

I was born and raised in Delhi, where I also completed my education. I have two brothers and three sisters. I am the fifth sibling. My father was a senior officer in the electronics directorate at DGTD, Udyog Bhawan, Delhi, government of India and my mother was a home maker.

I had initially planned on studying medicine and even qualified to go into pre-medical college in Hansraj College in Delhi. But then I got selected in Regional Engineering College, Kurukshetra, where I did electronics and communication engi-

neering in 1975. At that time, electronics was a relatively new subject, so I thought it would be better for me to enter this upcoming career line. Ours was the second batch of electronics and communication engineers in India with only about 400 passing out. I also earned a merit scholarship that covered the four years of my engineering degree.

My family

My wife Priti has been a professional Kathak dancer and has performed all over in India,
