

Auto Genius

Visit: www.cogxim.com; **Full version:** Paid

Auto Genius is an automobile software for managing accounting and inventory in multi-brand workshops, showrooms and garages. It is available both as desktop and online/cloud-based versions. Features include tracing job orders, storing registration and customer details, issuing materials, stock transfer, model- and colour-wise stock reports, workshop performance and delivery reports, and a lot more. Vehicle sale is possible directly or through challan. The system is suitable for tractors, three-wheelers and electric vehicles (EVs). General, service and insurance reminders are sent through bulk SMS.

Cars24

Updated: January 2020

OS: Android and iOS

Download: Full version (free)

Cars24 allows users to sell used cars, regardless of their present condition, model, state of registration and make, at reasonable prices to channel partners and car dealers, among others. Sellers can get a rough price estimate on Carcurator tool, or visit the branch for inspection and exact valuation through a live bidding process. Entire registration process is taken care of by the concerned team, and payment gets transferred quickly to sellers. Cars are available in various segments based on budget, transmission type (manual and automatic) and fuel type (petrol, diesel, CNG, LPG) in all major Indian cities.

Fortum Charge & Drive India

Updated: September 2019

OS: Android and iOS

Download: Full version (paid)

Fortum Charge & Drive India allows Indian electric vehicle (EV) drivers to access the company's public network of EV charging. It has a user-friendly interface and provides descriptive error messages for faults. A map (accessible even without logging in) is used to locate charge points. Once users set up their accounts on the app, they can start as well as stop charge sessions. Activating charging keys work as virtual keys for phones. Charging history and several payment options are also available for the charging sessions.

ElectreeFi

Updated: January 2020

OS: Android and iOS

Download: Full version (free)

ElectreeFi is a public vehicle charging platform that allows electric vehicle (EV) users to easily find and locate nearby open charging stations compatible with their vehicle, estimate and book charging slots, monitor charging status in real time, start and stop charging, and pay for sessions. Authentication is done via RFID or QR code. Invoice gets generated on the app, and transaction history gets saved, which can be viewed later. Alerts are sent to users whenever a new charging station is set up in the vicinity.

Zigwheels

Updated: February 2020

OS: Android and iOS

Download: Full version (free)

Zigwheels enables users to buy, sell or compare both new and pre-owned cars and bikes. Besides the available information related to specifications, variants, upcoming launches, prices and offers on the app, users can also connect with auto-experts on the forum to get their opinions. Car valuation tool estimates the price of old vehicles based on their pictures, model, year of purchase, kilometres covered and more. Users planning to buy cars and bikes can filter the list based on budget and location, and obtain contact details of sellers.
