

Wireless noise-cancelling headphones

World's first AI-driven noise-cancelling wireless headset

PLAY has launched PLAYGO BH-70, innovative noise-cancelling wireless headphones with active personalisation. PLAYGO BH-70 is the world's first artificial intelligence (AI)-driven noise-cancelling wireless headset. The product boasts of unique and AI-driven self-calibrating left and right earphones, hybrid active noise cancellation, smart-touch-and-talk and auto-pause-and-play features. Its 40mm device drivers churn out a perfect mix of bass and treble balance, and the huge battery of 1000mAh allows use of the headset for up to 24 hours even on ANC active mode.

Price
₹ 14,999

The headphones, powered by the latest family of Qualcomm processor, boasts of Bluetooth 5.0 connectivity, Apt-X codec with built-in CVC 6.0 noise-cancelling microphones, and are also compatible with voice commands that can be used with Google Assistant, Amazon Alexa and Apple Siri. These also have multiple modes of ANC on/off or even transparency mode, which allows users to hear ambient sound along with the adulating audio experience. Weighing only 300 grams, PLAYGO BH-70 comes with protein leather earcups for higher durability, and are comfortable and light to be used on long durations during flight travel and also for daily commute.

Indoor security cameras

Products that let users live carefree

blurams has announced the launch of two new indoor security cameras in India, namely, Home Pro and Dome Lite. With their compact design, blurams Dome Lite and Home Pro can be mounted just about anywhere in the home and feature up to 720p and 1080p HD video, respectively, along with intelligent alert, night vision, two-way talk and other features. The products also provide optional 24/7 continuous video recording feature, which helps in ensuring safety of all family members.

₹ 3499
(Home Pro) and
₹ 3999
(Dome Lite)

Other features include distortion correction, 3D noise reduction, motion/sound and facial recognition, built-in microphone and speaker, up to 128GB microSD cards, 24-hour lifetime-free cloud storage services. The newly-launched cameras are Alexa-enabled, and provide intelligent motion, sound and human detection.

Power bank

For charging on-the-go

As part of growing its categories beyond smartphones, Redmi has launched its first accessory, Redmi power bank in 10,000mAh and 20,000mAh variants. Redmi power bank features a minimalist design with anti-slip edge grip design that reduces the chances of accidental falls.

Redmi power bank features two input and output ports. The Type-C and micro-USB ports can be used for charging the power bank, and the two USB Type-A ports enable simultaneous charging for two devices. The power bank uses lithium-polymer batteries, which are not only safer but also have higher longevity as compared to lithium-ion batteries. Every Redmi power bank features twelve layers of circuit chip protection across voltage, temperature, current and electrostatic anomalies. The 20,000mAh variant supports 18W fast charging, and the 10,000mAh variant supports 10W fast charging.
