

operated versions, these sensors are used in R&D labs for quality testing, printing operations for roller alignment and automated production lines for dimensional gaging of parts in go/no go inspection. Data collected by the gaging probes are used for online quality control and post-process statistical analysis.

Inspection camera

Compact, portable and easy to use, Extech BR90 features a waterproof, flexible 8mm

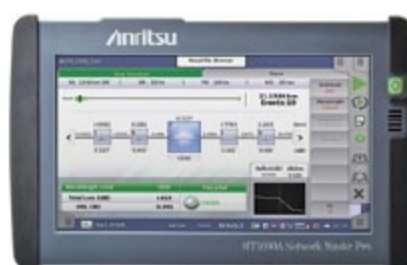

camera probe on a goose-neck cable and a large colour LCD display, fully loaded with everything needed for convenient inspections in the palm of the hand. The

borescope features a unique compartment to coil the camera probe for easy storage. Its 640 x 480 pixel resolution, 2x digital zoom and built-in bright LED lamps help project viewed objects clearly on the large 109mm (4.3-inch) colour LCD display. The monitor has adjustable brightness, 180° image rotation and mirror-flip feature and video output.

Optical network measuring instrument

The newly-developed MU100023A adds support for the 1650 nm wave-

length used for live-fibre evaluations to 1310/1550nm wavelengths used for actual communications to enable all-in-one, triple-wavelength optical time domain reflectometer (OTDR) measure-

ments. Like its predecessor MU100020A/MU100021A/MU100022A modules, in addition to having a built-in stabilised light source and optical power meter, the MU100023A features a built-in visual light source and optical-fibre scope options. Installing it in MT1000A offers all-in-one communications quality-inspections of each optical-fibre line, as well as live-fibre fault detection.
