

Wireless headphone

With active noise cancellation

Gurgaon based Play, which was making only neckband-style earphones so far, has launched PlayGo BH70—a pair of AI-based wireless headphones with active noise cancellation (ANC). This new pair of headphones also offers Bluetooth 5 with superior codec support and water resistance. The headset uses 40mm dynamic drivers and has a frequency response range of 20-20,000Hz.

PlayGo BH70 features a proximity sensor under the left earcup which automatically pauses music when you take off the headphones and plays it back again when you put them on.

The headset comes with a companion app, available on both Android and iOS, that helps to control certain features. It lets you keep the firmware up to date, adjust the noise cancellation level to allow some transparency, adjust the equaliser, and more. Apart from that, the headphones deliver up to 24 hours of

play-time on single charge. These come with a Type-C port for charging and it takes two to three hours to get charged.

Smart vacuum cleaner

With laser detect system

Xiaomi has announced Mi Robot Vacuum-Mop P in India that can vacuum and also mop. It is available only in black colour option. The Mi Home app can be used to control its functions. The product will be available for purchase post lockdown in India.

The smart vacuum cleaner comes with interesting features such as sweeping and mopping together, sweeping-only and mopping-only modes. With accurate mapping and anti-drop or anti-collision sensors, it makes sure that it doesn't drop from stairs or doesn't cross obstacles over 2cm high.

The product uses twelve sensors. It also has a Laser Detect System (LDS) that helps locate nearby objects and clean accordingly. It comes with a quad-core Cortex A7 processor that has 2,100Pa suction. Its 3,200mAh battery gives a runtime of 60-130 minutes.

Earbuds

With extra bass

Sony has unveiled wireless WF-XB700 earbuds that allow up to eighteen hours of listening. Just ten minutes of quick charging provides sixty minutes of playback time. The Tri-hold structure of the device creates a comfortable fit for both earbuds, and the Bluetooth technology eliminates need for wires.

There is extra bass for deep, punchy sound and easy hands-free calling, and voice assistant facilities. The earbuds will go on sale post the current lockdown in blue and black colour options. The device can also be used while gymming or while on the move. It is water resistant.
