Amazfit GTS. Amazfit GTS uses a top-class high-resolution screen, whose pixel density is as high as 341ppi and has a 348 × 442 resolution, bringing an unprecedented clarity to display. Moreover, the customised 4.2cm AMOLED display takes the splendor of its colour to a whole new level. The hundred per cent NTSC colour spectrum and ultra-high colour saturation make

the display super-lifelike, while a bright and transparent 2.5D glass lens makes every screen image stunning. The customised 4.2cm stylish square screen offers a larger display area than a round watch face of the same width, so it can carry more information. Apart from that, the company has released two innovative modular

watch faces that can be customised to display essential information such as heart rate, calendar, weather and events you care about the most, all in one watch face that's easy to check. In total, you can customise up to seven widgets out of seventeen functions.
