Functional Safety Ready Products

When Safety is Critical, Reliability Means Everything

When safety is critical to the success of your design, you can count on Microchip's proven experience to help you meet functional safety requirements, while minimizing cost and development time. Our broad portfolio of functional safety ready microcontrollers, digital signal controllers, memories, and interface and connectivity products is accompanied by state-of-the-art safety documentation, hardware safety features, safety software libraries, certified development tools and expert support teams.

Whether you need to meet mandatory requirements or differentiate your product, we can help you achieve your functional safety goals. Let us show you why we have a proven track record of helping customers with safety critical applications that conform to the functional safety standards:

- Appliances: IEC 60730 (Class B)
- Industrial: IEC 61508 (SIL)
- Automotive: ISO 26262 (ASIL)
- Medical: IEC 62304

To make it easy for you to find the right product for your design, we've developed the "Functional Safety Ready" designation. A product with this designation has been carefully selected as one that encompasses the latest features and support collateral. Speak to one of our experts who can help you simplify your design.
