

THANK YOU!

I love EFY since 1978. I have made a lot of projects published in EFY. I have also learned PIC microcontroller programming through the programming articles published in EFY. Once again, thanks EFY!

Vinay H. Parmar

❑ Electronics For You is a Bible for electronics fraternity.

Engr. M. Hyder Hossain

EFY. Thanks for the feedback!

...

EAT YOUR DRONE AFTER TRAVEL

The article titled 'You Can Travel In Drones And Eat Them Too' published in June issue was fantastic!

Prof. K. Padmanabhan

EFY. Thanks for the feedback!

...

AI IN EDUCATION PROGRAMME

I am interested in the topics related to AI used in the education programme.

Anirudha Kumar Baral

EFY. Thanks for contacting the EFY Group! The theme of the August issue was on education and skill development. There were some articles related to artificial intelligence (AI) used in the education system, including 'Technologies Reforming Education And Skill Development' and 'How AI Is Making Education Interesting And Better For Students.'

CONTACTLESS THERMOMETER

This is regarding 'Turn Your Phone Into A Contactless Thermometer' DIY article

published in September issue and also available on your website at <https://www.electronicsforu.com/electronics-projects/turn-your-phone-into-ir-contactless-thermometer>. After compiling the code, the results can be seen in Serial monitor, but there is a problem in creating the app using Kodular. The app only shows Text for List_pickers and doesn't show Bluetooth connect. Please help and also share the .apk file.

Sushil Kumar

The author Ashwini Kumar Sinha replies:

First, go to Bluetooth settings and pair the Bluetooth HC-05 with the phone. Now open the app, you will see the Bluetooth HC-05 in the list. The .apk file can be downloaded from the link: <https://efy.efymag.com/admin/issuepdf/Turn%20Your%20Phone%20Into%20A%20Contactless%20Thermometer.zip>

...

NOISE DETECTOR

This is regarding 'Make This Noise Detector For A Noise-Free Zone' DIY article published in March issue and also available on <https://www.electronicsforu.com/electronics-projects/noise-detector-for-noise-free-zone>. Can I connect ESP8266 for exchanging data between a smartphone and Arduino?

Ali N. Kh

EFY. ESP8266 is not used in this project. However, you can implement ESP8266 but that would be a different design, including the code and circuit connections.

...

PROTECT YOUR APPLIANCES

This is regarding 'Protect Your Appliances With This Power-On Delay Timer' DIY article published in July issue and also available on <https://www.electronicsforu.com/electronics-projects/power-on-delay-timer-2>. Make in India is becoming

a reality because almost everything, including electronics manufacturing, is possible here.

Arabinda Nayak

EFY. Thanks for the feedback.

...

ACCESS CONTROL SYSTEM

In the 'Basic Installation Of Access Control System' DIY article published in June issue, what is the model number of the standalone access control device used in the project? Where can I get it?

Pankaj Singh

EFY. The model number of the access control device used in the project is SA32-E. It is easily available on online shops such as Amazon.

...

SMART WATER METER

This is regarding 'Smart Water Meter To Help Control Water Wastage' DIY article published in June issue and also available on your website.

Can we use Arduino Uno instead of the Pro Mini? I am a novice; it would be great if you could help me.

Krunali Sheth

❑ In the 'Smart Water Meter To Help Control Water Wastage' DIY article, I am facing a problem with the App Inventor interface program. Please help.

Malik Akeel

EFY. Yes, you can use Arduino Uno instead of Pro Mini but note that Pro Mini is a small Arduino board and also cheaper than Arduino Uno.

Please elaborate on the exact problem you were facing with the app. In the meantime, please use the .apk file from the link given here: <https://efy.efymag.com/admin/issuepdf/Smart-Water-Meter-To-Help-Control-Water-Wastage.zip>
