

Power bank

With 18W fast charging

Mi Power Bank 3i with 10,000mAh and 20,000mAh capacities has been launched in India. Both the power bank variants feature dual input via USB Type-C and Micro-USB ports. These power banks support 18W fast charging and come equipped with advanced 12-layer circuit protection as well as a smart power management feature.

Users also get a two-way fast charging feature, allowing the Mi Power Bank 3i to be charged and charge another device simultaneously. The power bank's aluminium alloy case has a high structural strength that allows it to withstand collision and impact. It has an ergonomic arc design and an anodised finish that makes Mi Power Bank 3i resistant to sweat as well as corrosion.

There is also a low-power mode that can be activated by double-tapping the power button to charge devices like Bluetooth earphones or fitness bands. The power bank with 10,000mAh capacity takes about four hours to fully charge while the one with 20,000mAh capacity can be charged fully in seven hours.

Mouse

With DPI sensor

Logitech has launched MX Anywhere 3 mouse with customisable side buttons to control camera and mic settings during video calls. The mouse is ideal for advanced creators, developers, and analysts on-the-go. It features a 4,000dpi sensor.

The mouse scrolls up to 1,000 lines per second. It features the next-generation MagSpeed metal scroll wheel. It is available in three colours—graphite, pale grey, and rose. The company says that the wireless mouse is built to track virtually any surface, including glass, with its Darkfield sensor technology.

You can connect up to three devices via Bluetooth wireless technology or USB dongle that comes included with the mouse. Using the USB Type-C quick charging, the mouse can last up to seventy days on a single charge and three hours on a one-minute charge.

Fitness tracker

With SpO2 monitor

Amazfit has launched a new fitness tracker that looks quite similar to the Mi Band 5. The tracker comes in three colour variants—black, green, and orange. It features a 2.7cm (1.1-inch) AMOLED touch display with up to 45 watch faces. The fitness band also supports customisable watch faces, including photos. Amazfit Band 5 has a SpO2 monitor that is used to measure blood-oxygen levels. It can also track women's menstrual cycles and ovulation periods.

The fitness band supports up to eleven sports modes like indoor and outdoor cycling, swimming, skipping, and more. It offers 24/7 heart rate monitoring along with alerts for when the heart rate is high. The fitness band also offers sleep monitoring and stress monitoring.

It is equipped with Amazon Alexa for voice assistant support. It can be used to set reminders, control smart devices and, of course, ask questions. It comes with a 125mAh battery.
